

# VLCM's Virtual CISO (vCISO) Services

## Expert Cybersecurity Leadership for State & Local Government

### Why Public Sector Agencies Choose Us

For state and local governments, cybersecurity isn't just a technical need, it's a matter of public trust, operational continuity, and regulatory compliance. VLCM's Virtual CISO (vCISO) services deliver expert cybersecurity leadership to public sector organizations, tailored specifically to meet the needs of municipalities, agencies, and educational institutions. Our flexible model provides seasoned leadership without the expense of a full-time CISO.

### Key Benefits of Our vCISO Services

- **Public Sector Expertise:** We understand the challenges government agencies face: budget constraints, legacy systems, increasing cyber threats, and compliance with regulations like CJIS, NIST, etc.
- **Regulatory Alignment & Audit Support:** Stay compliant with federal, state, and local cybersecurity mandates. We help you prepare for audits, assessments, and grant funding requirements tied to security standards.
- **Budget-Friendly, Scalable Engagements:** Get access to executive level cybersecurity guidance at a cost aligned with public sector budgets. Our packages scale based on your needs.
- **Strategic Cybersecurity Oversight:** We proactively manage your security program, reduce vulnerabilities, and provide guidance tailored to your agency's goals and community responsibilities.
- **Customized Roadmap for Cyber Maturity:** We develop a strategic plan that aligns with your agency's mission, IT infrastructure, and compliance needs, helping you secure funding, avoid disruptions, and protect sensitive citizen data.

### Core Services

- NIST, CJIS and CIS Compliance Support
